SUMMARY

Motivated Computer Science graduate with 4+ months of hands-on frontend development experience. Built and deployed multiple responsive web applications using React.js, JavaScript (ES6+), and Tailwind CSS. Seeking a frontend developer role where I can learn, contribute, and grow while working on real-world projects.

WORK EXPERIENCE

I am a fresh graduate with a strong passion for frontend development. For the last 4+ months, I have been consistently learning and building real-world projects on my own.

I have hands-on experience in HTML, CSS (Tailwind CSS), JavaScript (ES6+), and React.js. I have successfully built and deployed multiple projects, including a Weather App, a modern Portfolio Website, and a fully functional E-commerce platform.

I also use Git & GitHub for version control to keep my code organized. I am a hardworking and self-motivated person who is always ready to learn and improve.

As a fresh graduate, I am looking for an opportunity where I can contribute to real projects, learn from experienced developers, and grow as a frontend developer.
